Gary,

The weekly rental rate is \$1,395.00. It comes preloaded with carbon that is \$1.40 per pound. The soonest it could be ready is this afternoon.

Respectfully,

Patrick Kerstens

Patrick:

We are looking at various vendors currently but we will likely need a unit on Monday or Tuesday morning early that is set up and ready to go.

Can you give me your pricing?

Gary,

I have included the data sheet of the vessel that I believe you will need. When will you need this unit by?

Respectfully,

Patrick Kerstens
